

Bayer

come help plant the seeds

for a diverse U.S. STEM workforce

## What:

### ***Bridging the Diversity Gap: Introducing STEM Industries to K-12 Best Practice Programs***

Bayer Corporation, as part of its award-winning *Making Science Make Sense*<sup>®</sup> program, is proud to announce it will be hosting a second STEM (science, technology, engineering and math) Education Diversity Forum in San Francisco, Calif.

A one-day event showcasing K-12 best practice STEM education programs that can be supported or replicated by industry, the forum will be moderated by Dr. Mae C. Jemison, the nation's first African American female astronaut, who is also a chemical engineer, physician and educator.

## When:

**Thursday, December 11, 2008**

## Where:

**San Francisco, CA**
